

Please consider the public comment you have received on this matter.
Please delay your decision until there has been time to get other
opinions besides that of the current presidential cabinet and
administration.

The public has a right as determined in the constitution to free
speech, democracy and to own the airwaves.

The corporations do not have this right. It was never intended to
be like this no matter that cable and the internet are here.

Please Do not make any more wholesale giveaways of air space.

Please do not let a few large companies own the major portion of
the media.

Thanks for your consideration.

Lowell Levinger
